## Specifications

The MINIFLEX Series consists of stackable chairs and armchairs on sleigh base or four legged, with or without handling grip, a stacking table, chairs with a flip-up writing tablet and dolly. There are four seats per package. The chairs, armchairs and tables can be attached with ganging PVC brackets.

The sleigh base and four legged frames are made of 3/4" diameter (19 mm) 14-gauge bent steel. Black plastic weld covers are fitted at structural joints and semi-spherical finishing caps at tube ends. Armrest support on armchair is part of the frame and reinforced with a 9/16" diameter (14 mm) steel rod. The backrest is made of 3/8" diameter (16 mm) 16-gauge steel. The front crosspiece is made of 7/16" diameter (11 mm) steel rod.

The seat is made of 14-gauge tubular steel screwed to two 5/8" diameter (16 mm) flat steel plates welded to the frame and can be replaced, as required. The backrest and seat use the patented A.D.I. "suspension" technique: flexible woven plastic belts are slipped onto the frames and pulled taught. The belts are covered with fire retardant 3/4" thick (19 mm) foam, and a 1/2" thick (13 mm) sheet of higher density foam is inserted inside the seat. Fabric or vinyl covers complete the upholstery and are neatly held in place with zippers.

The armrests are fitted with 1/8" diameter (28 mm) black high density rubber foam sleeves with a pellicular (closed cell) finish.

The flip-up and removable writing tablet is made of 3/4" thick plywood (19 mm) covered with high-pressure laminate on both sides (black or gray). The contour of the tablet is PVC. It is attached to the hinge welded to the 3/4" diameter (19 mm) 14-gauge steel tube.

The top of the stacking table is available in black or grey, and is made of 3/4" thick particle board (19 mm) covered with high-pressure laminate on both sides and edges. The sleigh base is fitted with four nylon glides and the four legs with metal glides.

The steel dolly can accommodate 20 chairs, armchairs or tables (2 pivoting and 2 fixed casters of 4" diameter (100 mm)). It is finished in black powder paint.

The black bookrack assembly is made of 3/16" steel rods (5 mm) welded at every 4" (100 mm). Field-installed.

## Colors and finishes

The visible portions of the frame of the seat, the table and writing tablet are available in black (powder paint) or chrome .
