

# PENTA

## Dimensions

a : 22½" (572 mm)	f : 10½" (167 mm)
b : 20" (508mm)	g : 28½" (724 mm)
c : 32" (813 mm)	h : 19½" (495 mm)
d : 18" (457 mm)	i : 17" (432 mm)
e : 16½" (420 mm)	j : 7" (178 mm)

c : Counter height stool : 40" (1016 mm)  
c : Bar height stool : 45" (1143 mm)

## Dolly

21½ x 27" x 23½" H. (546 x 686 x 597 mm)

Dolly with 12 chairs, armless only.  
Total height : 56" (1422mm)  
Depth: 38" (965mm)

## Specifications

The PENTA Series consists of chairs and armchairs on four legged base, with or without casters, counter and bar height stools. A dolly is available for stacking. A version on a 5 prong base with swivel/tilt mechanisms is available.

The frames are made of ¾" diameter (22 mm) 16 gauge bent steel. The seat and back are made of moulded polypropylene, average thickness of 3/16" (5 mm). The back is laterally located and inserted over the seat frame. The seat is positioned over the frame and is screwed to the seat through 4 positions.

The armrests are made of moulded polypropylene and are inserted by pressure over the back tubes. Left or right pivoting and retractable writing tablets may be installed.

The base is equipped with 4 polypropylene glides. 45mm casters are available as an option.

Cushions can be installed over the polypropylene seat. They are made of ¾" thick (19 mm) foam wrapped over a polypropylene shell and a fabric cover is string-attached to the assembly.

The steel dolly can accommodate 12 chairs (2 pivoting and 2 fixed casters of 4" diameter (100 mm)). It is finished in black powder paint.

## Colours and finishes

The shells are available in black. Arms are offered in black also. The frame is available in chrome, brushed chrome, black, sandy black, chrome, silver grey, dark grey, light grey and beige.

## 5 prong base version

The frame is built out of 2 flat steel longerons 3/16" (5 mm) thick, welded to a steel stretcher, all of which is welded to the 12 gauge (2,7mm) ribbed steel bridge required for the central base. The back is supported through two steel tubes ¾" dia. (22 mm) 16 gauge in thickness, welded to the longerons. All metal components are finished in black.
