c1: 44" (1118 mm)	j: 17 1/2" (444 mm)

a: 23 3/4" (603 mm)	d: 18" (457 mm)
b: 21 1/2" (546 mm)	e: 18" (457 mm)
c: 32 3/4" (832 mm)	h: 17 3/4" (451 mm)

## Specifications

The SENSE Series consists of chairs and armchairs on sled and four legged base, counter and bar height stools. A dolly is available for stacking. A version on a 5 prong base with swivel/tilt mechanisms is available.

The frames are made of 5/8" diameter 14 gauge bent steel. The seat and back are made of moulded polypropylene, average thickness of 3/16". The top part of the backrest is screwed to the top of the frame and the bottom part is inserted into a slide with 1/4" play that allows vertical and lateral displacement of the backrest. The seat is positioned over the frame and is screwed to the seat through 4 positions.

The armrests are made of moulded polyurethane and are screwed over a 5/16" metal plate that is welded on the frame.

The base is equipped with 4 polypropylene glides.

Cushions can be installed over the polypropylene seat. They are made of 1" thick foam wrapped over a polypropylene shell and a fabric cover is string-attached and stapled to the assembly.

The steel dolly can accommodate 20 chairs with or without arms, no cushion pad (2 pivoting and 2 fixed casters of 4" diameter (100 mm)). It is finished in black powder paint.

## Colours and finishes

The shells are available in black and white. Arms are offered in black. The frame is available in chrome, brushed chrome, black, sandy black, chrome, silver grey, dark grey, light grey and beige.

## 5 prong base version

The frame is built out of 2 round reinforced 5/8" dia. steel tubes welded along a 7/16" dia. steel rod. A 1/2" stretcher is welded to the back of the seat. The assembly is welded to the 12 gauge ribbed steel bridge connected to the central base. All metal components are finished in black.
